

Humphrey Products

7 FAST FACTS

- 1 Humphrey Products Company, headquartered in Kalamazoo, Michigan is a leading manufacturer of pneumatic and liquid control components and systems, serving organizations worldwide.
- 2 Established in 1901, Humphrey customers benefit from more than 117 years of manufacturing excellence and expertise in control of compressible and incompressible fluids.
- 3 Our full collection of over 9,000 industry-leading pneumatic and fluid handling valves and accessories are built in the United States with 96% of our supplier base located throughout the Great Lakes region.
- 4 The Engineered Solutions Group at Humphrey offers complete fluid handling and pneumatic system design, development and production services for high tech equipment and device makers.
- 5 Humphrey has enjoyed a long-standing partnership with Japan-based Koganei Corporation, a global leader in pneumatic automation components.
- 6 The Humphrey quality system has been registered ISO9001 since 1998, and registered ISO13485 for medical devices since 2012.
- 7 In Southwestern Michigan, Humphrey is recognized as a leader in private industry's support of STEM education, student outcomes and workforce development.

“From Bob Humphrey right on down to the people on the assembly line, Humphrey’s team of experts combines in-depth valve knowledge with innovation. They rose to the challenge to execute our idea and developed a pneumatic control manifold which enabled our project to succeed.” - Client’s Senior Principal Engineer

If you are looking for a partner with expertise in valves or other control products, consider Humphrey. Our team of fluid control experts is trusted by designers and manufacturers around the world.
