

California Prop 65 Warning

The California Safe Drinking Water and Toxic Enforcement Act, better known as Proposition 65, lists over 900 chemicals or compounds that are known to the state of California to cause cancer and/or birth defects or other reproductive harm.

Proposition 65 requires manufacturers and distributors to provide a clear and reasonable warning before knowingly and intentionally exposing anyone to a listed chemical.

Humphrey Products is dedicated to providing safe products to our customers. However, because it is not feasible to test against the everchanging list of chemicals included with this Act, we have elected to provide a warning for all our products, based on the premise that one or more chemicals or compounds from the Proposition 65 list “may” be an ingredient or residual in a component included in our products.

Due to design and/or intended use, exposure levels are most likely to be zero or if present, well below the levels of concern outlined in the Proposition 65 Act, and it is out of necessary caution that we have elected to apply the following warning to all our products. For more information, please visit www.P65Warnings.ca.gov.

WARNING

California Proposition 65

ADVERTENCIA

Humphrey Products Company manufactures valves and valve systems. These products might expose you to one or more of the 900+ chemicals that are known to the State of California to cause cancer, birth defects or other reproductive harm. Some of the substances we are aware of that may be present in our products are as follows:

- Lead, which is an ingredient found in the brass material that is used for some components.
- Nickel and associated compounds used in plating, stainless steels, aluminum, and other materials.
- Other compounds found in the plastics and rubber seals that may be used in some products.
